REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest a table top and process of making a table comprising a top layer including a plurality of first decorative members which are spaced apart from each other to form gaps, a cured binder filling the gaps and forming a layer that covers a bottom surface of the top layer, one fastening member including a head portion embedded in the cured binder, and a fastening portion extending out of the cured binder from the head portion, and having a cross section smaller than that of the head portion and a rigid support plate adhered to the cured binder, the rigid support plate including at least one hole corresponding to the fastening portion of the fastening member for passage of the fastening portion of the fastening member therethrough.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Castle, Clark et al, Saltzman et al, Schrunck, Turner, Church et al, Rubenstein, Hodgen, teach structure similar to applicant's. However, none of the references teach providing a fastening member in a plurality of layers with gaps, a binder filling the gaps and a further support plate.
